

My husband had the stem cell injections in both knees. At one month he is feeling no pain. He is walking where before he could not walk more than 30-50 feet ~~before~~ without resting. He had <sup>some</sup> relief within 4 days. He will begin therapy right away. He took one Tylenol on second day after injection nothing since then. He is so relieved to be pain free. He looks forward to being able to get back to a more active lifestyle. He also operates a bobcat on a farm we have, he was not able to even climb into the machine before the injections. He is now operating the machine.
