

Understanding Your Diagnosis

The Process Goong Chiropractic Clinic Uses To Diagnose Your Condition

The goal of Goong Chiropractic Clinic is to restore health and well-being to the sick and suffering using Advanced Therapeutic Techniques for mind/body wellness. Every patient is unique so first; we need to understand your health concerns. This is how we get there...

Overview Of Your Health

Includes:

1. Health Questionnaire
2. Consultation with Doctor
3. Physical Exam
4. Orthopedic Exam
5. Neurologic Exam

NET Diagnostics

Includes:

1. Find hidden trauma
2. Find dates of trauma

**How your mind affects the way your body works.*

X-ray Diagnostics

Includes:

1. Skeletal view
2. Physical Subluxations
3. Genetic Potential

**Identifies C-1 and C-2 subluxations*

QRA Exam

Includes:

1. Electrical Frequency Imbalances
2. Nutritional Deficiencies

**Molecular look at your body's energy*

Muscle Testing

Includes:

1. Locate traumatized nerves and organs
2. Identify blocks in Electrical Systems

**Weak muscles show blockage*

Plan For Your Care

1. Identify symptoms, problems, and concerns.
2. Decide on treatment protocol.
3. Trauma Correction Program.
4. Correct subluxations.
5. 10 Steps to Wellness

Notes:

The Mechanisms of Trauma and the Use of Frequency Therapy as a Diagnostic Tool

An "event" becomes a "trauma" when it suppresses your immune system.

Traumas can be:

- | | |
|----------------------|-----------------------|
| 1. Physical | 6. Foreign Substances |
| 2. Emotional | 7. Radiation |
| 3. Chemical | 8. Scars |
| 4. Electrical | 9. Spinal |
| 5. Foreign Organisms | 10. Teeth |

Immune System is suppressed.

Problem in teeth affect every nerve in your body.

X-rays used to diagnose C1 - C2 disruption.

Laser therapy used to reset normal energy frequencies.

Your body displays symptoms

Frequency applied to body. Muscle test used to find disruption in organs.

Stress Reaction occurs

Organs reflect to your body's structure and may cause subluxation.

NET used to find and release trauma memory markers.

Your organs and tissues are then disrupted from a normal state.

The shift in your molecular structure causes your DNA to change.

The energy disruption will cause interference to your electrons, atoms and molecules and they shift from a healthy state.

For every action, we can expect an equal and opposite reaction. A trauma disrupts the body's energy and sets off a negative chain reaction.

Goong Chiropractic Clinic uses the Erchonia Cold Laser to reset your electrical field imbalances.

Your body is made up of electrical energy

Laser Therapy

The human body is an electrical system and the quality and quantity of the electrical impulses conducted through the nervous system can be measured, altered and manipulated.

When the brain and body are traumatized, the speed and frequency of the nervous system's electrical impulse, (the quality and quantity), are altered. Using QRA, NET and the cold laser, these altered frequencies can be measured and corrected.

Why Traumas Influence Changes In Your DNA

**Excerpts from article by Grazyna Fosar and Franz Bluudorf*

“THE HUMAN DNA IS A BIOLOGICAL INTERNET and superior in many aspects to the artificial one.

There is evidence for a whole new type of medicine in which DNA can be influenced and reprogrammed by words and frequencies WITHOUT cutting out and replacing single genes.

Only 10% of our DNA is being used for building proteins. It is this subset of DNA that is of interest to western researchers and is being examined and categorized. The other 90% are considered “junk DNA.” The Russian researchers, however, convinced that nature was not dumb, joined linguists and geneticists in a venture to explore those 90% of “junk DNA.”

Their results, findings and conclusions are simply revolutionary! According to them, our DNA is not only responsible for the construction of our body but also serves as data storage and in communication. The Russian linguists found that the genetic code, especially in the apparently useless 90%, follows the same rules as all our human languages. To this end they compared the rules of syntax (the way in which words are put together to form phrases and sentences), semantics (the study of meaning in language forms) and the basic rules of grammar.

The Russian biophysicist and molecular biologist Pjotr Garjajev and his colleagues also explored the vibrational behavior of the DNA. The bottom line was: “Living chromosomes function just like solitonic/holographic computers using the endogenous DNA laser radiation.” This means that they managed for example to modulate certain frequency patterns onto a laser ray and with it influenced the DNA frequency and thus the genetic information itself.

One can simply use words and sentences of the human language! This, too, was experimentally proven! Living DNA substance (in living tissue, not in vitro) will always react to language-modulated laser rays and even to radio waves, if the proper frequencies are being used.”

How We Scan For Traumas And Blocked Patterns

1. Muscle testing.

Muscle testing allows us to test you beyond your perception of yourself. We are consciously only aware of 12% of our body. This minimizes our ability to make the correct diagnosis using general standard of care procedures. Muscles are organs, just like your heart liver lungs and spleen. Bu using muscle testing we can examine every nerve and organ in your body, just like an electrician would examine your electrical circuits looking for a blown fuse. A weakness indicates the result of an unresolved trauma and existing maladaptive stress reaction and electrical interference. Because your body is electric, there is an electrical interference, a weakness.

2. The Role of Memory and Physiology.

When we remember a traumatic event, the brain will duplicate the physiology that occurred at the time of the event, and the muscle test will go weak. The limbic system, the emotional system of the brain, where all the memories are stored, does not know the difference between what you think about or what has actually happened. That is why an electrical signature of the traumatic event that is beyond your perception can trigger it. An emotional trauma may have the same effect as a car accident.

3. Semantic Responses

The physiology of the body can be reactive to the sight, smell, sound and taste of the trauma event. It can also react exactly the same to a word or picture or thought about the event. This is why we can use words as a *semantic response tool* with the muscle testing to find organs' specific traumas.

4. Physiologic Response Phenomena

Physiologic response phenomena is observed with muscle testing when the body is tested for something known to be true or a beneficial substance and it electrical frequency and signature that are congruent with the coherent electrical laser like vibrations of the body. When exposed to negative inferences and untruths or traumatic events or incongruent electrical frequencies that would be depolarizing, the muscle test would go weak.

5. Repetition Compulsion

Once we have been traumatized, injuries and insults will continue to affect our health and our future. In physics, like attracts like. We also broadcast an electrical field and the trauma frequencies that we acquire will attract other similar frequency that can perpetuate our condition and situations in life.

6. Conditioned Responses

Trauma events recorded in your DNA will create a conditioned response that will continue to influence you beyond your perception.

7. Emotions and Your DNA

Emotions are minute proteins in the body called information substances. These information substances, our emotions permeate our entire body and our DNA. They are recorded in our DNA. (Pert, molecules of emotion)

How One Injury Site Can Affect Multiple Body Sites

When an injury occurs, if the body is nutritionally deficient or immune-compromised at the time of injury, the injury site can become blocked in the meridian points where the trauma occurred. This routinely reflexes to one or more areas of the body (which can be small medium, or large reflex areas) creating chronic symptoms. Almost 80% of the time the foreign organism at the trauma site will also develop a biofilm. A biofilm is a complex community of a number of different microorganisms coexisting together and marked by the excretion of a protective and adhesive matrix. The biofilm acts like a protective force field around the microorganism. This environment promotes up to a **1000-fold increase in antibiotic resistance**, meaning that foreign organism within a biofilm community can withstand and resist the killing effects of antibiotics 1000 times more than same species of bacteria living in stand alone, free-floating non-biofilm environments.

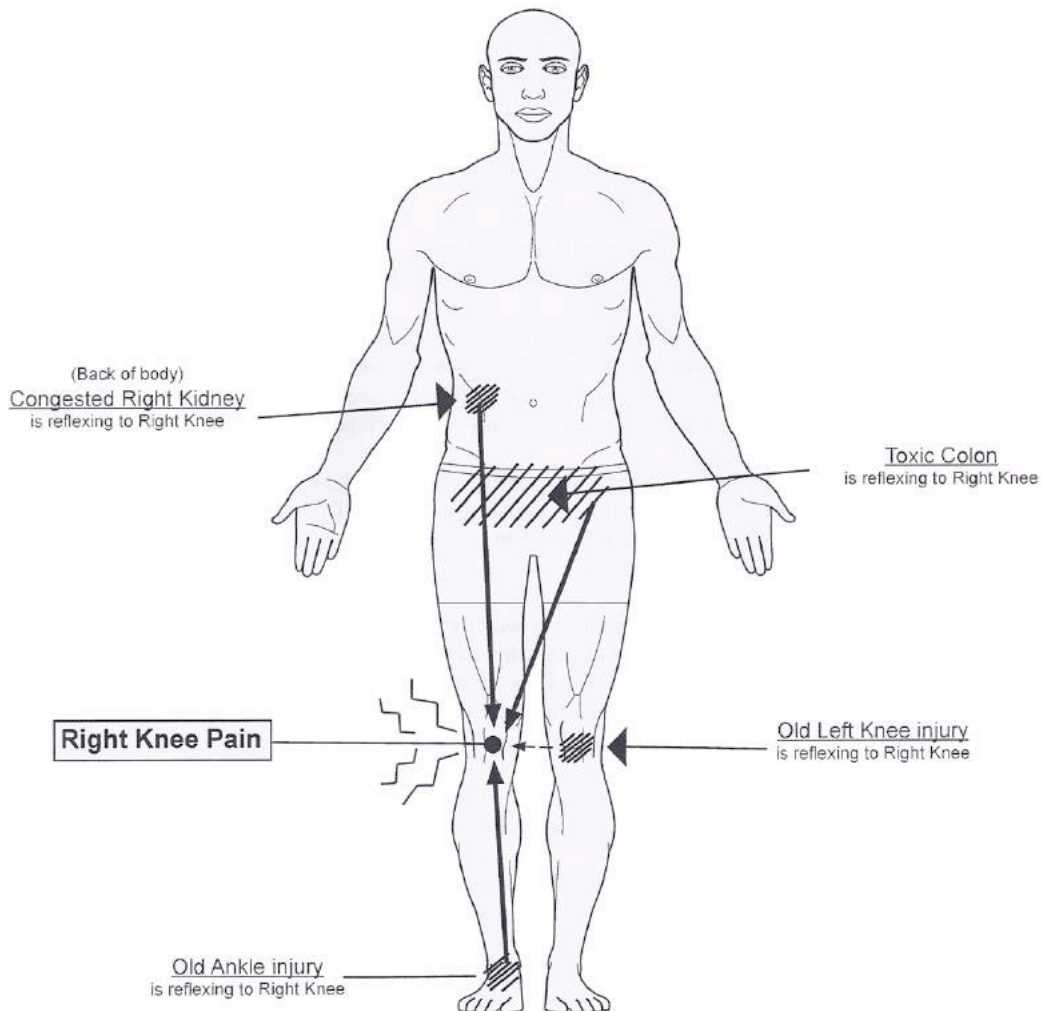

Layered Traumas

Frequently, one or more blocked trauma sites may reflex to the same body area and layer on existing traumas. In these cases, the symptoms will not abate until **ALL** the traumas have been cleared. You may have multiple traumas that reflex to the same area. In this case, clearing one trauma will help improve the area but the symptoms may not be completely and permanently cleared until **ALL** the traumas have been eliminated. *Most trauma sites need to be cleared separately, layer by layer, until all are cleared.* Different foreign organisms, biofilms and blocked meridian points will require different treatments because each one is unique and has its own “signature”.

Example:

Symptom: Chronic Right Knee Pain

QRA Analysis: Four interference fields, caused by trauma, all reflexing to the same knee area.

Why Do My Tests Show Multiple Traumas and Biofilms, But I Don't Have Any Symptoms?

Throughout our lifetime we will experience a multitude of events that may cause our body harm. These events can be:

1. Physical 2. Emotional 3. Chemical 4. Electrical 5. Foreign Organisms
6. Foreign Substances 7. Radiation 8. Scars 9. Spinal Injury 10. Teeth Problems

If the body corrects the harm of these events, they will not become a trauma.

A Trauma is an event that suppresses your immune system, will change your DNA and usually cause a biofilm to form.

When the body has traumas it can't correct, due to a compromised immune system, it will automatically compensate and adapt. This does not mean you no longer have a trauma. Once the body can no longer compensate and adapt you will become symptomatic.

Being healthy is not just an absence of symptoms!

One of the most challenging problems for recovery is when the body forms a biofilm. (80% of microorganisms will probably form a biofilm if not corrected immediately!) A microorganism encapsulated by a biofilm has 1000-fold increase in antibiotic resistance, meaning that bacteria within a biofilm community can withstand and resist the killing effects of antibiotics 1000 times more than same species of bacteria living in stand alone, free-floating non-biofilm environments.

Imagine if you had multiple biofilms that your immune system was battling! The immune systems would go into overdrive and you now have an autoimmune response.

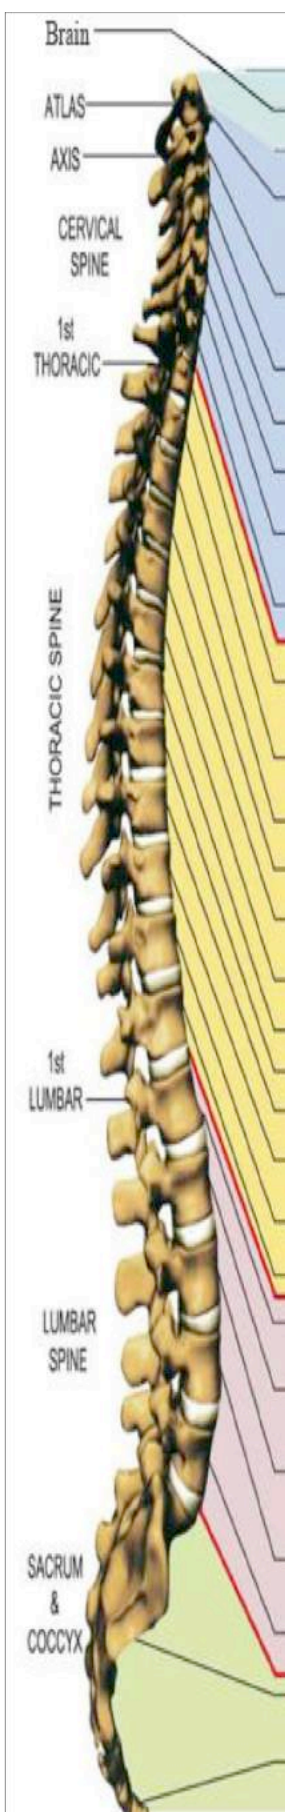

Since each biofilm has a different composition, we need to help the body break them down, one by one, so it can reach the microorganism and correct itself. You may not feel better right away if your body has numerous biofilms, but if you stick with the treatments you can break them down and help your immune system get stronger so your body can correct the problems.

Tooth-Organ Meridian Chart

Sense Organs	Inner Ear	Maxillary Sinus		Ethmoid Cells	Eye	Frontal Sinus		Frontal Sinus	Eye	Ethmoid Cells	Maxillary Sinus	Inner Ear

Name _____

Date _____

VERTEBRAE	Areas & Parts of the Body	Possible Symptoms
BRAIN	GV20, Hypothalamus, Deep Sleep, Brain 2, Brain 3, Cell Energy, Limbic, Occipital Lobe, Parathyroid	Anxiety, Brain Fog, nervousness, insomnia, head colds, nervous breakdowns, amnesia, sleeping sickness, chronic tiredness, allergies, Immune / Auto Immune Reaction
C1	Blood supply to the head, the pituitary gland, the scalp, bones of the face, the brain itself, inner and middle ear, the sympathetic nervous system	Headaches, high blood pressure, migraine headaches, mental conditions, dizziness or vertigo, Stress Reaction, Biofilms, Heavy Metal Toxicity, Radiation Toxicity
C2	Eyes, optic nerve, auditory nerve, sinuses, mastoid bones, tongue, forehead	Sinus trouble, crossed eyes, deafness, eye troubles, earache, fainting spells, certain cases of blindness
C3	Cheeks, outer ear, face bones, teeth, trifacial nerve	Neuralgia, neuritis, acne or pimples, eczema, Neurodegeneration
C4	Nose, lips, mouth, eustachian tube	Hay fever, catarrh, hard of hearing, adenoids
C5	Vocal cords, neck glands, pharynx	Laryngitis, hoarseness, throat conditions like a sore throat or quinsy
C6	Neck muscles, shoulders, tonsils	Stiff neck, pain in upper arm, tonsillitis, whooping cough, croop
C7	Thyroid gland, bursae in the shoulders, the elbows	Bursitis, colds, thyroid conditions, goiter
T1	Arms from the elbows down, including the hands, wrists and fingers, also the esophagus and trachea	Asthma, cough, difficult breathing, shortness of breath, pain in the lower arms and hands
T2	Heart including its valves and covering, also coronary arteries	Functional heart conditions and certain chest pains
T3	Lungs, bronchial tubes, pleura, chest, breast, nipples	Bronchitis, pleurisy, pneumonia, congestion, influenza
T4	Gall bladder and common duct	Gall bladder conditions, jaundice, shingles
T5	Liver, solar plexus, blood	Liver conditions, fever, low blood pressure, anemia, poor circulation, arthritis
T6	Stomach	Stomach troubles, including nervous stomach, indigestion, heartburn, dyspepsia, etc.
T7	Pancreas, islands of Langerhans, duodenum	Diabetes, ulcers, gastritis
T8	Spleen, diaphragm	Hiccoughs, lowered resistance
T9	Adrenals or supra-renal glands	Allergies, hives
T10	Kidneys	Kidney troubles, hardening of the arteries, chronic tiredness, nephritis, pyelitis
T11	Kidneys, ureters	Skin conditions like acne, pimples, eczema, or boils
T12	Small intestines, fallopian tubes	Rheumatism, gas pains, certain types of sterility
L1	Large intestines or colon, inguinal rings	Constipation, colitis, dysentery, diarrhea, ruptures or hernias
L2	Appendix, abdomen, upper leg, cecum	Appendicitis, cramps, difficult breathing, acidosis, varicose veins
L3	Sex organs, ovaries or testicles, uterus, bladder, knee, circulation	Bladder troubles, menstrual troubles like painful or irregular periods, miscarriages, bed wetting, impotency, change of life symptoms, many knee pains
L4	Prostate gland, muscles of the lower back, sciatic nerve	Sciatica, lumbago, difficult, painful, or too frequent urination, backache
L5	Lower legs, ankles, feet, toes, arches, lymph	Poor circulation in the legs, swollen ankles, weak ankles and arches, cool feet, weakness in the legs, leg cramps
SACRUM	Hip Bones, buttocks, Pubic Bone	Sacro-ialic conditions, spinal curvatures
COCCYX	Rectum, anus	Hemorrhoids or piles, pruritis or itching, pain at the end of spine on sitting

Trauma from Electrical Field Disruption

EMF stands for electromagnetic field. Everything has its own electromagnetic field. Additionally, everything man made has an electromagnetic field (i.e., electronic technology). It is a measurable type of energy, and for the human body the EMF frequencies truly are the life of our cells.

When healthy, the human body has very specific EMF frequencies that resonate with the Earth's frequency at approximately 7.5HZ.

Healthy tissues have these strong frequencies. Unhealthy or diseased tissues have weak or altered (different) frequencies.

Our healthy EMF frequencies become weak or altered for various reasons, but most commonly by too much exposure to other EMF frequencies that are out of the realm of our healthy body frequencies.

EMF radiation problems for the human body generally come from sources originating from: **electric, magnetic, wireless and ionizing radiation.**

When Healthy human tissue is disrupted by artificial man-made frequencies, it creates a trauma in the body.

This type of trauma does **NOT** get stored in the organs like other traumas, it will reflex to the brain, disrupt all four polarity points and get recorded on our DNA. The trauma now affects every organ meridian in the body.

Goong Chiropractic Clinic practitioners use the Erchonia Cool Laser to repair and restore the natural frequencies of the human body.

Don't underestimate the importance of having a healthy electromagnetic field. If you have any type of unhealthy tissue in your body, it has the wrong unhealthy frequency. If your tissue has the correct electromagnetic field, it IS healthy tissue - and without foreign invaders or damaged cells.

**REMEMBER - NOTHING HEALS THE BODY!
THE BODY HEALS ITSELF WHEN PROVIDED WITH WHAT IT NEEDS.**

Stress Response to Trauma

Trauma triggers a Reaction in the Brain

- 5. Nerve and Organ Dysfunction
- 4. Brain Stem is Compressed. Blood Supply is Compromised

3. Kidneys and Adrenals trigger Sacrum and C2 to subluxate.

2. Pituitary Gland triggers Adrenals, Thyroids slow, Kidneys contract and Sex Organs slows.

1. Immune System Compromised - Autoimmune System On - Triggers C1 Subluxation - Triggers Pituitary Gland

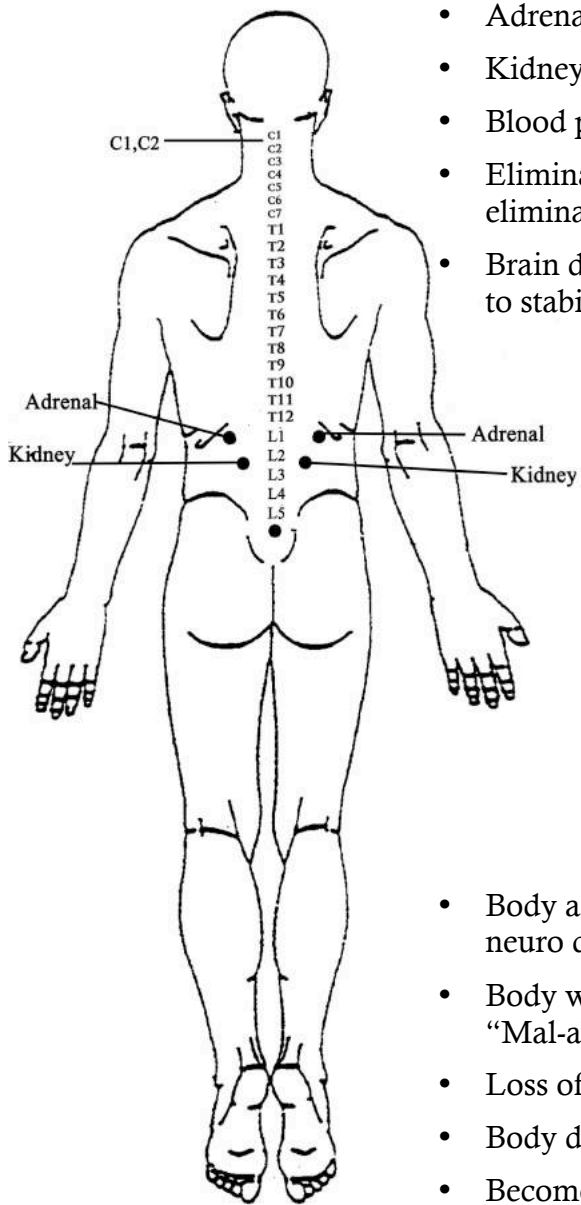

Your Body is now in a Stress reaction from the trauma.
All energy will go into the stress reaction

The reactions in the body now become a symptom of the trauma.

Chiropractic Adjustments will not be fully effective. (Back that always goes out syndrome)

Effects On Your Body From A Stress Reaction

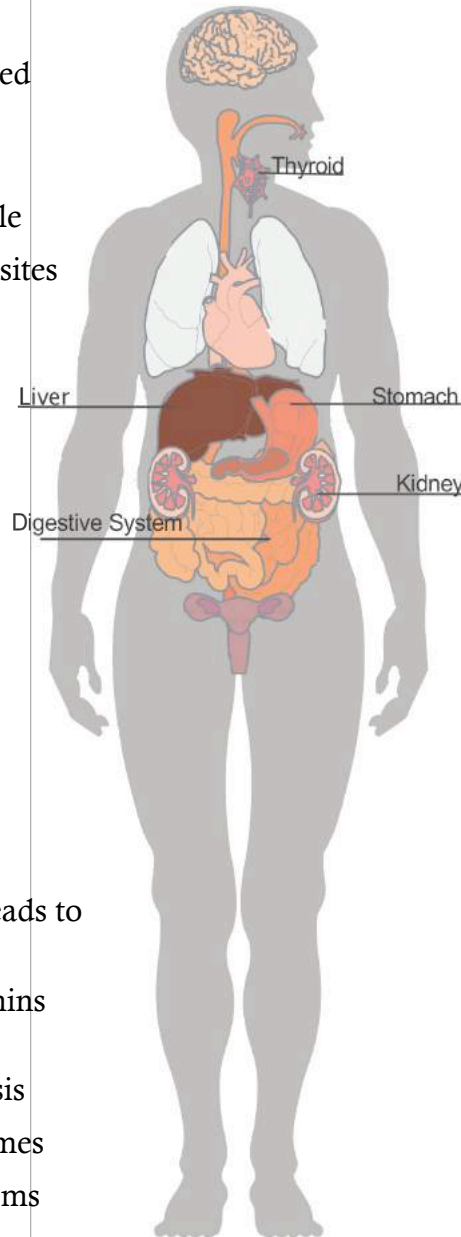

- Adrenals dilate, hyper reaction
- Kidneys constrict, minerals not absorbed
- Blood pressure goes up
- Elimination organs constrict, do not eliminate toxic residue and must recycle
- Brain deposits toxic residue in trauma sites to stabilize an unstable area

Results

A Toxic Body

- Body accumulates heavy metals and leads to neuro degeneration
- Body will not absorb minerals or vitamins "Mal-absorption Syndrome"
- Loss of bony tissue leads to osteoporosis
- Body does not produce digestive enzymes
- Becomes susceptible to foreign organisms

Autoimmune Reaction & Neurodegeneration

The mechanism by which the immune system is corrupted can best be realized when you understand that the two poles of the immune system (the cellular and humoral mechanisms) have a reciprocal relationship in that when the activity of one pole is increased, the other must decrease. Thus, when one is stimulated, the other is inhibited. The immune response is inhibited by the brain as a result of trauma.

This suppression of the cell mediated response is thus a key factor in the development of life threatening infections. The organisms continue circulating through the body, adapting to the hostile environment by transforming into other organisms depending on acidity, toxicity and other changes to the internal terrain of the body.

As a consequence, the side of the immune system that is supposed to kill the viruses and other pathogens, the T cells, is actually suppressed and becomes ineffective so it can't kill them. The B cell side that causes allergic and autoimmune activity becomes over-active. So the immune system becomes seriously compromised, and cannot work like it should. Autoimmune conditions develop where the overactive inflammatory side of the immune system starts attacking cells where pathogens or toxins are hiding forming an autoimmune reaction against the myelin basic protein in your myelin sheath, etc.

Molecular mimicry is due to similarity of proteins contained in organisms and mammals. (For example, the measles virus is made up of proteins similar to myelin basic protein; thus, antibodies formed against the measles virus antigens subsequently also cause an auto-antibody attack against myelin basic protein in the myelin sheath due to cross reactivity of these antibodies.)

Vaccinations & Neurodegeneration

Vaccines contain a slew of toxins, including mercury in many cases, which flood the body of an infant or child. These completely overwhelm the child's ability to deal with those toxins. With undeveloped immune systems, babies and young children simply cannot handle the toxins and pathogens in the vaccines. (Even adults have problems. Vaccines introduce many more toxins into a child than it is able to get rid of. As a consequence, the toxins get stored in the cells. According to the CDC's own website, common ingredients in vaccines include:

1. antibiotics (which many children are allergic to)
2. aluminum gels (which can, if there is a silicon deficiency, cause brain conditions like those exhibited in Alzheimer's disease)
3. formaldehyde (a highly toxic carcinogen)
4. monosodium glutamate or MSG (a potent excito-toxin capable of causing seizures, brain tumors and more)
5. egg protein (which can cause a life-threatening anaphylactic reaction)
6. sulfites (which can cause allergic reactions)
7. Ethyl-mercury containing preservative thimerosal has been found in many vaccines, and still is in some

Vaccinations & Neurodegeneration *continued*

Vaccines are designed to stimulate the immune system, but in newborns, there is nothing for the vaccine to stimulate. The vaccine literally causes multiple viral infections in the child that overwhelm the immune system.

They also start an autoimmune system reaction against the myelin sheath and nerve fibers of the brain, brainstem, spinal cord, spinal nerves, organ meridians and visceral nerves.

IgA (an antibody found predominately in saliva and secretions of the gastrointestinal and respiratory tract mucosa) are the initial normal antibody response to all airborne and ingested foreign organs.

Bypassing this mucosal aspect of the immune system by directly injecting organisms into the body [via vaccines] leads to a corruption in the immune system itself whereby IgA is transmuted into IgE, and/or the B cells are hyper-activated to produce pathologic amounts of self-attacking anti-bodies as well as suppression of cytotoxic T cells.

As a result, the pathogenic viruses or bacteria cannot be eliminated by the immune system and remain in the body, where they cause chronic disease and thus further grow and/or mutate as the individual is exposed to ever more antigens and toxins in the environment.

Biofilms

Biofilms are produced by foreign organisms in the body, including bacteria. They protect them from the immune system, antibodies and antibiotics. They are a mucopolysaccharide secretions that are like an oil spill in your body, blocking the normal flow of air, blood, water for nutrition and the excretion of residues from the organs and body. They are detrimental to the wellbeing and our life expectancy. They enable foreign organisms to propagate exponentially, unchecked by our natural defense mechanisms against infection.

Heavy Metal Toxicity

Mercury and environmental metals are converted to methyl mercury by bacteria and other foreign organisms becoming a highly dangerous neuro toxin easily absorbed by the brain and nerve cells. The cells then become toxic at an accelerated rate beyond normal. This accelerated neuron death is the beginning of neurodegeneration. Neuro degeneration is the opposite of cancer, with cell death happening faster than the body can regenerate itself

Plan For Your Care

Next Steps

1. The Doctor will review your history, test findings and analyze and measure your x-rays.
2. The combined information allows the Doctor to diagnose your phase of degeneration and the state of your health.
3. After completion of the review, the Doctor will decide on your treatment protocol and establish your options for care.
4. A Report of Findings, with your recommendations for care, will be prepared for you and presented at your next appointment.

Every Patient is unique. By going thru this process we are able to develop a very specific plan just for you. Your participation in your care is essential to your wellness. The staff and Doctors are available to answer all your questions and concerns. We want you to understand your findings and the process you have been thru.
