Mission Statement

Our Passion is to share and celebrate in the healing journey of every family and individual who chooses to be lovingly served by us in a relaxed atmosphere.

We recognize health is an inherent state of well-being in mind, body and spirit. Our role is to remove any interference to health expression through optimal chiropractic and nutritional care supported by wellness education.

Our goal is to help create a world of maximized health and optimum human potential.

How Safe Is Chiropractic? How Do You Define Safe?

Years of training and the experience of giving thousands of adjustments make chiropractic care safe.

Even with clear warnings in the media and sun screening products, 6,000 people will die this year from skin cancer. Chiropractic care is much safer than getting a so-called "healthy" tan.

Many people take aspirin, ibuprofen, muscle relaxers, and other pain relief drugs. Besides covering up the symptoms and ignoring the underlying causes, 4,000 people will die this year from reactions to medically-prescribed drugs. Chiropractic care is much safer than drug therapy. Most people consider aspirin safe, yet a staggering number of people will die this year from its use. Chiropractic care is much safer.

Every year, about 100 people get struck by lightning. You are more likely to get hit by lightning than to have a negative reaction to a chiropractic adjustment. Chiropractic is safer than being caught in a thunderstorm.

In fact, of the millions of patients who will benefit from chiropractic care this year, only a handful will have a newsworthy experience.

Is chiropractic care safe? Yes! Especially when compared with other forms of treatment.
