Dear Friends,

It is strongly recommended that you return within one week following your treatment to check that it has completed. If it has not, symptoms may arise which may continue for days, weeks, or even months if you do not repeat the treatment on the same item until the allergy is completely eliminated. If symptoms arise, please contact us immediately. It is your responsibility to return after at least 25 hours to determine the status for your previous treatment and re-treat if necessary.

Please sign this letter denoting your clear understanding of the above.
