

WHAT DO WE DO?

The Phoenix Thera-Lase System works by supplying energy to the body in the form of non-thermal photons of light. The body is able to absorb this external energy on a cellular level and transform light energy into chemical energy, which the body uses to accelerate the normal healing rate of tissue.

The treatment is delivered as a function of and is dependent on wavelength, power, and time. Wavelength and power factors determine the penetration depth and quantity of energy available to transfer to the cells, and the type of healing determines the length of time needed to administer the treatment.

Phoenix Thera-Lase offers higher power, and greater penetration than other laser therapy systems and the results will be more rapid, and sustainable.

WHAT IS THE PHOENIX THERA-LASE SYSTEM?

The Phoenix Thera-Lase System is a non-invasive, drug free laser therapy treatment which provides relief from acute and chronic pain, reduces inflammation and or scar tissue related to soft tissue injuries.

Treatable Conditions Include:

Acute and Chronic Pain
Inflammation
Scar Tissue
Post-Operative Conditions
Soft Tissue Injuries
Neuropathy
Wound care
Sprains
Migraines, Etc.

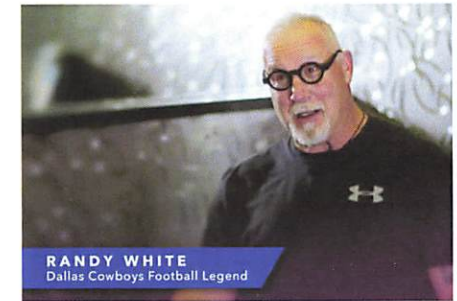

WHAT CAN THE PATIENT EXPECT?

The Phoenix Thera-Lase certified laser technician will complete a pain assessment, and develop a treatment plan specific to each patient. The injury site itself will be treated first, then specific target points associated with injury site such as connective tissue and basic muscle groups are saturated based on predefined protocols that have been developed.

The patient is re-assessed at each visit, and the progress is charted and tracked. The number of visits is dependent on the nature of the condition. Each patient responds differently to the laser treatment. Example; an acute condition requires fewer treatments than something more chronic.

The treatment is quick, painless and comfortable. There are no side effects nor contraindications associated with this therapy.

TESTIMONIALS

"I wish when I was playing that the Phoenix laser was available because it would have helped me recover from a lot of injuries"

Randy White
Former Dallas Cowboys, HOF #54
