

Why Choose VAX-D Genesis?

VAX-D has been the subject of many clinical studies to determine how effective it is and how it works. VAX-D has demonstrated success rates of 75% in clinical studies, at hospitals, and at hundreds of private outpatient clinics.

People that were once forced to compromise their daily activities can now live pain free lives.

Treatment Is Easy.

Each treatment lasts about 45 minutes. VAX-D clinics in the US and around the world are treating thousand of patients each day for chronic spinal pain. Studies show that seventy percent of these patients experience positive outcomes.

Study after study shows that VAX-D's patented disc decompression systems are helping pain sufferers to significantly reduce their pain and avoid expensive surgery.

Solution
For Back
& Neck Pain**

What Is VAX-D Genesis?

VAX-D Genesis is a new computerized treatment for chronic neck pain, low back pain and sciatica. The treatment is safe and effective without the risks of injections, anesthesia or surgery.

Chronic pain is one of the most debilitating health conditions. Studies show that back and neck pain is often recurrent even if the original problem resolves, many patients suffer chronic symptoms at intervals. Chronic pain sufferers often live a life of compromise in their daily activities.

VAX-D treatment is designed to relieve the pressure on the structures that may be causing chronic spinal pain. It can relieve the pain associated with herniated discs, degenerative disc disease, and sciatica.

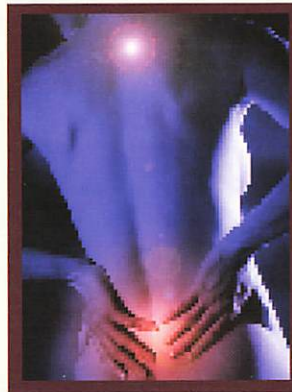

Can VAX-D Genesis Work for you?

The Genesis system provides relief for patients suffering from the common causes of low back pain, neck pain and leg pain. VAX-D is the only back treatment device that has been shown to decrease the disc pressure in clinical research.

Many patients experience a relief of their pain and other symptoms during the treatment sessions, and then a gradual reduction in symptoms as treatment progresses.

The treatment consists of about 20 daily sessions of 45 minutes each on the Genesis system. A VAX-D practitioner will determine your course of therapy and whether or not you are a candidate for treatment.

Patients with certain conditions such as tumors, bone fractures, or osteoporosis are not candidates for this therapy. Patients that have had back surgery and continue to have pain may also be treated (Failed Back Syndrome).

Why is VAX-D Effective?

VAX-D distracts the spine, taking the pressure off of the discs and spinal nerves, and allows the back to heal itself.

The Genesis system uses the latest technology available that can be programmed to apply tension while following the natural curvatures of the spine.

About VAX-D Genesis Therapy.

Patients find the treatment to be comfortable and relaxing. All treatments are administered with patients fully clothed. Clothing that separates at the waist and that can be loosened at the wrists and neck is most comfortable.

Many patients are not satisfied with the effectiveness of the treatment choices offered like drug therapy, chiropractic, physical therapy, exercise, acupuncture, injections and surgery.

If you are suffering with chronic pain, VAX-D Genesis may be your answer. For more information or to book an appointment with Dr. Michael Sheps, call 310.873.4422.
